Electronic Bill Pay

Activity Summary Report

Automated Tank Monitoring System(ATMS)

Electronic Forms

Training/Support Documents

Soybean Haulback Processing

KEY FEATURES & FUNCTIONALITY:

- **Grower Order (GO) Entry and Reports** - This fulfills Monsanto’s requirement for electronic grower order data submission. Varied reports are also available to track Grower/Customers and Products Ordered.
- **Dealer Order (DO)** - Tool used to order and reserve seed directly from Monsanto. From this, order deliveries are created.
- **Grower Point of Sale (GPOS)** - Ability to transmit Grower Orders via the Sales Express Entry tool, and to reconcile sales data via various reconciliation reports.
- **Grower Licence Lookup** - User can look up any grower in the Monsanto Database to check if the grower has a valid Monsanto Trait Stewardship Agreement. This tool also can access the Monsanto Unauthorized Grower List.
- **Electronic Bill Pay** - This tool allows qualified users to make payments directly to Monsanto. This tool also has functionality to pull statements and invoices.
- **Automated Tank Monitoring System (ATMS)** - Allows monitoring the gallon levels of user’s chemistry bulk tanks. Also tracks all fill and draw activity.
- **Electronic Stock Transfers** - Ability to submit and approve seed stock transfers from dealer to dealer.
